

When you simply need a reliable High Definition video connection and analog devices are involved, we have the affordable solution that's built to perform. Our CVB-1 converts Analog Video (component, YPbPr, YUV, etc.) onto CAT/5 or better UTP cable for extended runs of up to 300 feet at 1080i resolution. In addition, we also include IR-Pass Thru connection on an industry-standard mini-jack!

This Component Video Balun incorporates the highest quality conversion transformers; housed in a shielded, steel enclosure with integrated mounting flanges.

And with a footprint of just 2" x 2¼" x 1" including the mounting tabs, good things really do come in small packages.

CVB-1

Component Video Balun

We are Transmative Engineering.

CVB-1 Product Highlights:

- Highest quality transformers
- Computer-Grade circuit board
- Durable Shielded steel enclosure
- Industry-standard IR mini jack
- Integrated steel mounting flanges
- High Quality CAT/5 connector
- Ultra-Compact size

CVB-1

Component Video Balun

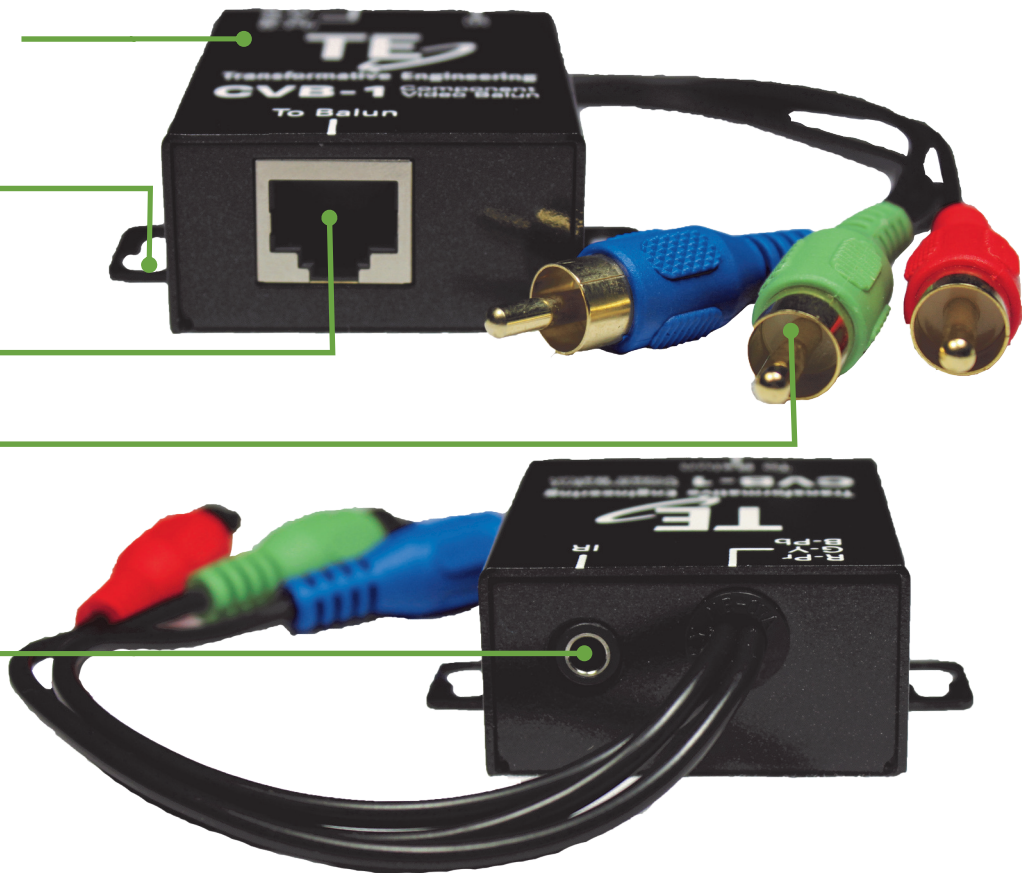

Rugged shielded aluminum enclosure
brushed anodized surface

Aluminum mounting brackets

RJ-45 jack

Component video connectors

IR Pass-Thru

CVB-1 Specifications:

- Connections: Component Video red, green, and blue RCA (male) type connectors (3)
2-Conductor, 1/8" mini-jack (female) for IR Pass-Thru (1)
RJ-45 Jack for UTP Connection (1)
- Case Style: Stamped stainless steel, shielded and grounded
- Bandwidth: 300MHz, +/- 3dB
- IR: IR Passive rated for 65Volts AC or DC @ 1.5Amps
- Warranty: 3 Years Parts and Labor
- Included: (2) CVB-1 units per box (matched pair)
