

HDS-12-4K

2-Way HDMI Stabilizer Conditioning Splitter

The **HDS-12-4K 2-Way Splitter** is the latest of our renowned splitter line. From our first problem-solving HDS-12 thru our innovative HDS-12i format converting device, **Transformative Engineering** has always taken the approach

of solving installers' issues in a reliable, unique way.

With the industry

firmly embracing all things 4K and all that comes with it, our approach to splitting a full 4K, 60Hz, 4:4:4 signal with all HDR and audio formats needed to be simple and straightforward.

The **HDS-12-4K** couldn't be simpler. One HDMI input, two mirrored outputs with no switches, buttons, dials or settings to worry about.

Whatever you plug in you get output times two.

In addition, we provide a path on one output for Audio Return Channel ("ARC") and Consumer Electronics Control ("CEC"). There is also a USB port for future firmware updates as they are issued.
