

**Instruction Manual Addendum:**

This version of the HDS-12 Splitter has a (covered) jack labeled “TE CCA1” This is designed for our optional Closed Contact Adapter (see below image). This Adapter will provide a closed contact whenever there is a valid HDMI signal at either, or both outputs. This is useful for providing feedback to your Automation System, or for signal issue diagnosis.

This Adapter is available from your Distributor, or directly from Transformative Engineering at 781-769-6410.
